Accord

Achieving Comprehensive
Coordination in Organ Donation

A UNIQUE OPPORTUNITY IN TIME

Achieving Comprehensive Coordination in ORgan Donation intends to strengthen the full potential of Member States (MS) in this field, to improve cooperation between them and to contribute to the effective implementation of the *Directive 2010/53/EU* and the Action Plan on Organ Donation and Transplantation.

ACCORD represents strategically a unique opportunity in time, as it is now when the national provisions derived from the Directive are being worded.

ACCORD will contribute to the Health Program and Work Plan 2011 through the activities carried out in the three core work-packages that will be focused on:

1. Developing live donor registries and fostering international data sharing on live organ donation across the EU
2. Increasing the availability of organs from deceased donors by strengthening the cooperation between intensive care units (ICUs) and donor transplant coordinators (DTCs)
3. Promoting international exchange of best practices and consolidated expertise in organ donation and transplantation through twinnings

Training capacity, exchange of best practices and net-working activities in all three fields will be promoted.

ACCORD will also facilitate the consistent implementation of the *Directive 2010/53/EU* across the whole Union, provide MS with concrete assistance in meeting the objectives of the Action Plan and enhance cooperation between MS and beyond.

Achieving Comprehensive Donation intends to strengthen Member States (MS) in this area, to improve the implementation of the Directive and to develop the Action Plan on Organ Donation.

ACCORD represents strategy in time, as it is now when derived from the Directive.

ACCORD will contribute to the and Work Plan 2011 through out in the three core work focused on:

1. Developing live donor international data sharing across the EU
2. Increasing the availability of donors by strengthening intensive care units (ICU) coordinators (DTCS)
3. Promoting international and consolidated expertise in transplantation through

Training capacity, exchange of working activities in all three

ACCORD will also facilitate implementation of the Directive whole Union, provide MS with meeting the objectives of the ce cooperation between M

MAPPING

The action will perform a state-of-art on e tner countries.

SHARING

A living donor registry of European living do ACCORD core Work package .

BUILDING

Putting expertise in common and defining living donor registry will be discussed and essential components of national strategies living donation in the European Union.

MAPPING

A review of existing end-of-life care pathwa carried out, with special focus on practices

SHARING

Best practices for facilitating the identificat version into actual donors will be shared, effective connection between intensive care tors that facilitates deceased donation.

BUILDING

New tailored-to local needs tools that w performance in the donation rocess and t donors will be supplied..

MAPPING

Expertise of a given Member State can mee programmes will be performed in ACCORD formance, quality and safety of the supporte

SHARING

The organization of the national procureme and the support of kidney paediatric transpla Setting up a national accreditation system f covered in Cyprus, Czech Republic, Malta an in organ recovery for surgeons will be cover

BUILDING

Setting up potential EU tools for the accred in organ recovery, and one-to-one support system will be addressed by capitalizing o Twinning models in the field Is another goal

WP4

MAPPING

The action will perform a state-of-art on existing living donor registries in partner countries.

SHARING

A living donor registry of European living donor registries is one final goal of this ACCORD core Work package .

BUILDING

Putting expertise in common and defining clinical parameters for building up a living donor registry will be discussed and agreed. Living donor registries are essential components of national strategies targeted to increase the safety of living donation in the European Union.

LIVING DONOR REGISTRIES

WP leader: Dutch Transplant Foundation

WP5

MAPPING

A review of existing end-of-life care pathways in different Member States will be carried out, with special focus on practices relevant to organ donation.

SHARING

Best practices for facilitating the identification of potential donors and their conversion into actual donors will be shared, to guide on the establishment of an effective connection between intensive care units and donor transplant coordinators that facilitates deceased donation.

BUILDING

New tailored-to local needs tools that will allow Member States to improve performance in the donation process and to increase the number of deceased donors will be supplied..

WP5

COOPERATION BETWEEN ICU PROFESSIONALS AND DTCS

WP leader: National Health Service Blood and Transplant

WP6

MAPPING

Expertise of a given Member State can meet the needs of others. Three twinning programmes will be performed in ACCORD with the final aim of improving performance, quality and safety of the supported countries' transplant systems.

SHARING

The organization of the national procurement system, data collection and analysis and the support of kidney paediatric transplantations will be addressed in Bulgaria. Setting up a national accreditation system for transplant centres will be the area covered in Cyprus, Czech Republic, Malta and Lithuania testing a training platform in organ recovery for surgeons will be covered by the cooperation with Hungary.

BUILDING

Setting up potential EU tools for the accreditation of Transplant Centres, training in organ recovery, and one-to-one support for the development of a Transplant system will be addressed by capitalizing on experience. Guideline for further Twinning models in the field is another goal of this ACCORD work package.
